BELOEIL EXCHANGE '80

BENEFITS OF AN EXCHANGE

by VAL CARR

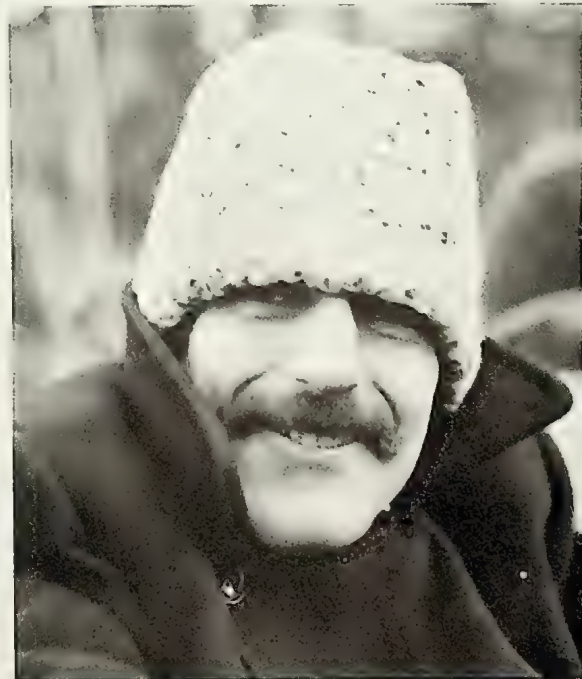

What is an exchange? An exchange is the sharing of culture and language between two groups of people.

During the months of February and March, students from M.E. LaZerte and L'Ecole Polyvalente Beloeil, in Quebec, participated in such an exchange. Although it was a learning experience, the lessons learned could not be taught or learnt in any classroom.

The cultural differences are immense. The French are so cordial and formal all the time. While in Quebec, I was not just a visitor to the house but I became a part of the family. The hardest time I had was trying to decide which fork to use at what time. Also, getting doors held open, and getting chairs pulled out for me was a shock. When in a shopping center and needing help, most people seemed genuinely eager to help.

The language was a little hard to master at times, especially when spoken at breakneck speeds, but everyone made it through all right. Knowing how to play charades came in handy when trying to tell a story to someone who didn't understand. There were many such situations that aroused.

After being on an exchange to Quebec, my French has improved, but more importantly, I made new friends. Personally, I feel it was a very rewarding experience and if I had the chance, I would go on another exchange, not only to Quebec, but to anywhere. I also recommend it to anyone who likes to meet people and have fun at the same time.

IMPRESSIONS OF THE BELOEIL EXCHANGE by CST. CINDY HRECZUCH

I first came in contact with the French Exchange students at the Black Cat Ranch outside of Hinton. I never wore my uniform during those two days and as a result several M.E. LaZerte students had difficulty convincing the French students that I was in fact a police officer. I, as well as all the students, enjoyed several activities even though I am not bilingual. On the day following the trip, I visited the hospitality room in the school in uniform. By seeing me first as a person and then as an officer, the French students didn't react adversely to me at all. I enjoyed their company for a final excursion. When we visited the Legislative buildings and Fort Edmonton. Before saying "Bon Voyage" several French students insisted that I should make it possible for their school to get a School Resource Officer and I guess that says it all.

LE VOYAGE A BELOEIL

par BEV PIPER

La première semaine de février, je suis allée à Beloeil, Québec. C'était un échange avec l'école. Vingt-six autres personnes sont allés avec moi. Nous avons visité la ville de Montréal. C'est une grande ville avec de très vieilles maisons. Pendant notre visite, nous sommes restés avec des étudiants de la Poly-Bel.

La première semaine de mars, les étudiants de Beloeil sont venus à Edmonton. Tout le monde est allé à Jasper et nous sommes restés au Black Cat Ranch pour deux jours. Nous avons vu la ville d'Edmonton, mais Montréal est plus intéressant.

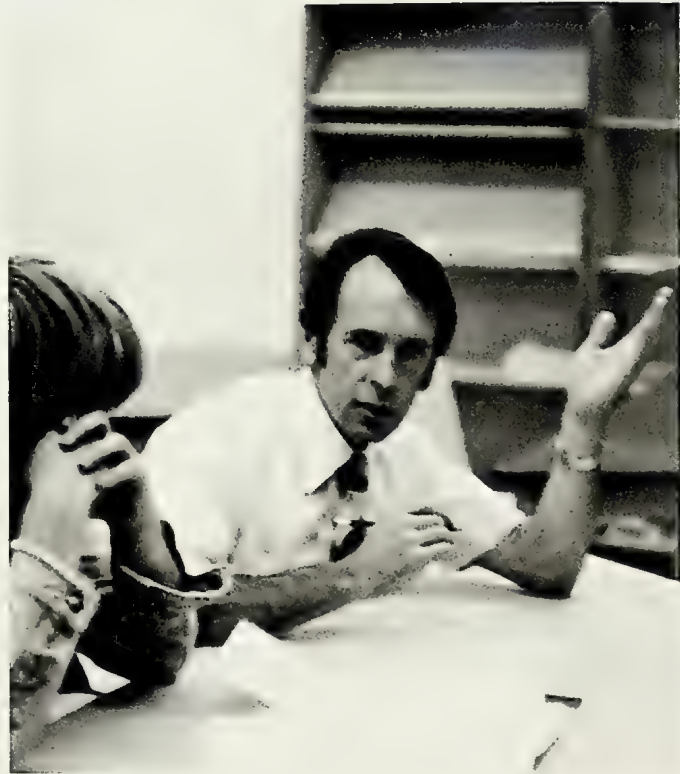

THE GREAT AUSTRALIAN

FROM MR. PROBST

The year of 1979 is indelibly inscribed in my mind. It was the year in which one conservative old Aussie along with his wife and four children crossed the Pacific to finally spend many hard working hours at M.E. LaZerte.

What differences are there in the students? "Not many" is my learned reply because young people in both countries face similar situations and problems. The Canadian may have greater access to drugs but before long the Aussie will "outdrink" him and both rate a high chance of smashing themselves up in a car before 23 years of age. The Australian will present a rougher exterior to the world, especially in terms of speech. Both will use naughty words quite generously.

Let us not become despondant, though. We all have remarkable qualities and enormous untapped abilities that can help us to make the world a better place as well as enabling us to cope ourselves. We should all look to the future with confidence taking care that a sense of humour is manufactured in the frown.

CANADIAN EXCHANGE

FROM MR. HILLMAN

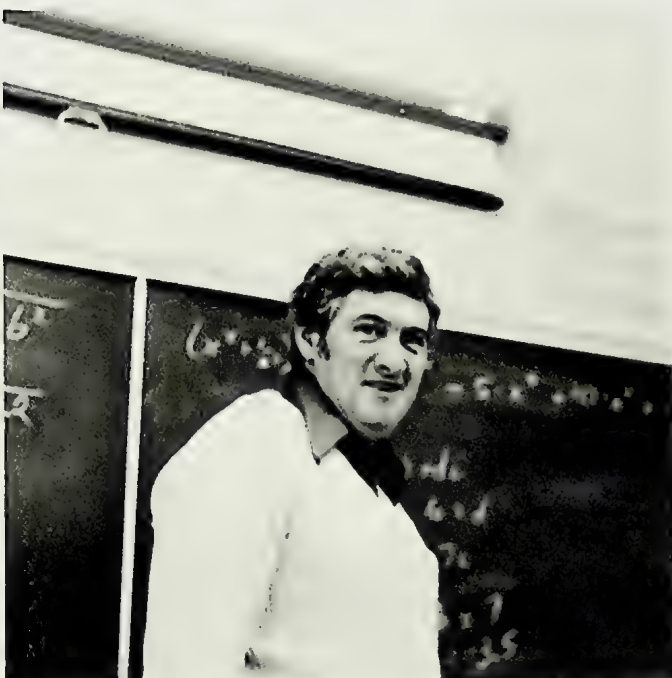

A YEAR IN AUSTRALIA; or TEACHING GREY KANGAROOS IS NOT MUCH FUN

1979 is a year which will be long remembered by my family and me because we had the extreme good fortune of having been selected to exchange with a family from Australia. The selection took place early in 1978 and after considerable negotiations, we traded jobs, homes cars, etc. with Mr Probst from Shepparton, Victoria in Australia.

Shepparton is a beautiful city of about 25,000 people which is about 120 miles north of Melbourne, the capital city of the state of Victoria. The district is very different from the Edmonton area. Although during the winter months of July and August, there is skiing only 60 miles from Shepparton, no snow falls in the city. Flowers bloom throughout the entire year, even though overnight low temperatures in the area are as low as 0 to -6°C. Without snow, the general appearance of the city is very clean. The land surrounding Shepparton is so flat that the only hill is the area was given the name "Mount Major." The major industries are dairying and fruit growing, so many people are employed in canneries. One cannery in Shepparton is so huge that it covers 40 acres of land and takes about half an hour to walk through the warehouse which has unlabelled cans stacked from floor to ceiling.

The school to which I was assigned was Shepparton Technical College, a technical-vocational high school for Forms I to V (Grades 7 to 11). The aspects which I found most different from school life at M.E. LaZerte were that the student population were all boys and everyone wore a school uniform of grey pants, a grey shirt and a grey jumper (Sweater). Incidentally, the interior and exterior walls of Shepparton Technical College are grey.

The opportunity to live and work in another country for a year allowed us to learn about their culture, to develop friendships and to travel. Rather than one long vacation, the Australian School year has several short vacations. During these holidays we visited the Island State of Tasmania, and the states of South Australia, New South Wales, Queensland, and the Northern Territory. It was a great year. However, the greatest long term benefit obtained from the experience for me and my family is a greater appreciation of the quality of life we have here in Alberta.

CAMPUS LIFE

Campus Life. It's hard to put into words what it is . . . fun and crazy times, a ski trip, a burger bash, a breakaway to California . . . but it's more than that. It is friends, support, and guidance in values and principles that help to make us complete and fulfilled.

This season had an exciting beginning as our seniors were rated number one in the city, following the preliminary geographical round. The second round included the top seeded eight teams in the city and the fortune of the team bottomed out. Injuries to four of our most experienced players (from a junior tournament in minor soccer competition) forced our team to cope without them for most of the second half of the season. The vital qualities of leadership and encouragement were hard to find. The season ended with an eighth place finish which the players found discouraging.

With the playoffs just around the corner, the players have met often and have endeavoured to build up the team spirit and determination. The first game is against, so goes, the top team in the league at the seasons conclusion. The job of securing victory will be challenging. All power!

The team is learning the value of team co-operation and good will. What finer lesson could there be?

YEARBOOK MESSAGE

Ten years have elapsed since LaZerte opened. The building is beginning to show signs of wear because of the non-institutional materials used. The original concept of using an individualized approach for each subject has changed - and evolved into an approach which builds on its strengths. However, the school philosophy which emphasized the importance of the individual student has not changed. We still try to have students feel they are important and treated fairly. We still feel it is important to teach students to make decisions and be responsible for the consequences of their actions.

We have established a tradition of graduating mature, responsible citizens and we are proud of our graduates.

(G.E. Mills)

VALEDICTORY ADDRESS

Mrs. Mills, teachers, guests, parents, fellow graduates.

These past years at M.E. LaZerte have been a struggle for some of us, or should I say, a struggle for all of us. We have been involved in a constant search for self-identity, a worthwhile goal in life, and most important of all, 100 credits. Our never ending quest for credits has finally ended, though, and we are here to celebrate as a result.

Even if we have succeeded in our main goal, there are still many other things that we should have gotten out of coming to high school. Hopefully, we learned enough to enable us to cope with the increased responsibilities with which we will be faced. We learned in the classroom about the theoretical aspects of life, but we learned outside of the classroom as well. From our actions outside of school we have hopefully found out a bit about the system firsthand. This, combined with acquired knowledge from the classroom, should be very useful as we go out into the world. With our experiences during the last three years to guide us, we should be competent enough to manage as mature, responsible adults.

Also, in our years of high school, we have made countless friends, and have had a lot of good times. I'm sure all of us will remember these experiences forever. I'd have to admit that although I'm known to complain, it really hasn't been a bad three years. I think we all realize that the years ahead may be a little more difficult.

As we head out into the world, we must be aware that the future holds many challenges. We will be faced with the task of making many decisions that are suitable for ourselves and others. We will probably never totally succeed in fulfilling this challenge, but I think that the members of the class of 1980 will do their best to make this world a better place in which to live.

We have come a long way since we started school back in grade one, and although this is an important phase in our lives, we have a long way to go yet. This is a time for us to make important choices about the future, about the lifestyle we intend to live and the careers we intend to pursue. Whatever decisions are made though, the important thing is that the results be favorable. These decisions are not easy ones to make. Most of us seek help from family, friends, teachers, and counselors, and we should be thankful to them for their assistance and patience in these and other matters. In the end, however the final decisions have to be made by ourselves.

I don't believe in talking for too long a time so in closing I'd like to extend my congratulations to all graduates. We are following the footsteps of generations of the past, and our footsteps will be followed by generations of the future, but right now it is our turn. It is a time for change in our lives, a time when we leave the shelter of the school to be given our place in society. In whatever we do though, I'm sure we will do our best and make everyone proud. Best of luck to all of you in the future in whatever you do.

(Kathy Wosley)
